## Datto SaaS Protection for Microsoft 365

With fully installed Office applications across multiple devices, hosted email, and online file storage and sharing, Microsoft 365 Business Standard is the most comprehensive package available for businesses with 300 or fewer users. The robust package supports greater productivity and collaboration in the workplace, with all of the features of the Microsoft 365 Apps for Business and Microsoft 365 Business Basic packages together in one integrated product.

Microsoft 365 Business Standard includes all of the popular Office applications like Word, PowerPoint, Excel and more. Each user can install Office on 5 PCs or Macs, 5 tablets (Windows, iPad, and Android), and 5 phones, all with anytime, anywhere access. Businesses can also simplify email with business-class Microsoft Exchange email hosting with a 50 GB mailbox.

In addition, Microsoft 365 Business Standard provides access to a wide range of business tools, including HD video conferencing, Microsoft Sway, which provides a set of professional digital storytelling tools to create interactive reports and presentation, and corporate team sites and social networking capabilities

All Microsoft 365 Business packages include 1 TB of file storage per user, a guaranteed uptime SLA of 99.9%, complementary support, and Active Directory integration.
